*Offering hope and healing through the
grace and forgiveness of Jesus.*

Divorce Thru the
Eyes of a Teen

Divorce and separation are all too common in today's families. We have all heard the statistics on our nation's sky-rocketing divorce rates and thought about the number of adults affected each year by divorce... but think about the number of children and teens each one of those divorces represents. Statistics show that over *1 million* children experience divorce or separation in their families *each year*.

Because of turmoil that most adults experiencing separation and divorce go through, children often end up caught in the middle with many mixed-up emotions of their own,

unsure of where to turn. Now there is a solid Christian curriculum written just for teens that addresses the specific and unique challenges a teen, experiencing divorce or separation in their family faces.

THE BIG D promotes identifying and finding the strength to accept and heal from the various hurts and confusion a divorce can cause. It begins with denial, pushes through anger issues, and ends with the freedom to understand and experience true forgiveness. Whether through a weekend event or the 12 week program, you will leave a changed person who has the tools with God's help to navigate your future.
